The Centralized Credentials Verification Service has completed several key factors to assist in the goal of becoming certified by the National Committee for Quality Assurance in June, 2001.

A mock NCQA survey was conducted by C. Mobley & Associates, LLC at the request of the Arkansas State Medical Board for the purpose of determining compliance with the NCQA CVO Standards. The CCVS is expecting to become certified in eight (8) out of ten (10) elements. The methodology the mock survey used was:

- Several phone consultations with CCVS personnel prior to the on-site mock survey; pre-review of materials off-site and on-site, which included documents, policies, forms, charts, etc. that will be requested at the time of actual survey; meetings with management and the CCVS Advisory Committee Chairman; interviews with staff, file audit, tour and observation for two days.

The mock surveyor gave the following summation, “The CCVS is in a good position for a successful NCQA survey. Modifications to policies and procedures will more clearly delineate actual practice as well as simplify the language used to define the procedures used. The CCVS is a unique organization in that it is currently the only credentials verification organization nationwide that is a component of a state medical licensing board with an integrated data collection and verification process. Added to its uniqueness is the approved state legislation that once CCVS becomes certified by NCQA, a mandate will become effective, which will require all healthcare organizations within the state to utilize the CCVS process. Organizations will not be able to request any information from other sources that is identical to that which the CCVS collects and verifies. Your organization has the opportunity to establish a model program that other licensing boards may consider adopting. The ASMB/CCVS has a dedicated staff who desire a very successful survey outcome as well as continued success as a CVO. They have worked hard to get the program where it is today and have a great deal of pride in their accomplishments.”

Distribution of the revised Policies & Procedures will be via USPS to every hospital, managed care organization and credentialing organization, who credentials physicians in Arkansas. Policy revisions are expected to be completed by the end of April, 2001. The Board must have the current mailing address for each of these organizations in order for the communication process to be effective.

An education and marketing program geared toward the implementation of the mandate, which is pending certification by NCQA, is currently being developed under the recommendations of the CCVS Advisory Committee. Projected launch date and further information will be released in the coming months.
